

Crack Sealing Equipment Rental Information

Disposable Totes:

Each tote contains 1,000 KG of cold pour crack sealant.
We sell them for \$1,200 per tote or \$1.20 per KG for the material.
Totes can be thrown out after use.

Application Rates:

We find that on average, our customers use approximately .3-.5 litres per linear meter, depending on the size of the cracks. One tote could do 2,400 + linear meters, depending on crack size.

Crack Sealing Rental Units:

The rental units can be picked up from our Bruderheim, AB location.

We rent them for:

- \$400/ Day
- \$ 1,500 / Week
- \$ 5,000 / Month

Two people can be applying crack sealant at the same time (two wands).
We provide all of the necessary equipment, including V-squeegees.

You will need:

- Truck capable of pulling 3,500 KG (7,800 pounds)
- Labour for application 2-4 staff
- 2 Flaggers to control traffic (if necessary)
- 1 Driver Pick Truck
- 1 labour applying the crack sealant with wand
- 1 labour using V-squeegee to smooth out crack

On highways most customers don't blow out cracks but our units do have air compressors, should you want to use them. Another method is to have one person walk ahead of the truck with a backpack leaf blower to blow out all the cracks before hand.

The speed of this process depends on the severity of the cracks.

This link will show you the process: https://youtu.be/Kn_hAoGScTA

There are pictures of the unit on the next page. As you can see you can the unit will suck from the disposable totes to get the material into it. The pump is run by air. The compressor is gas powered and will only run when it needs air.
